17th China International Metal Recycling Conference 2026

May 13-15, 2026 Shangri-La Hefei Hotel, Anhui, China

Overview

In 2025, the steel scrap industry steadily advanced amid transformation and nurtured new opportunities amid challenges. The industry deeply integrated into the national "dual carbon" strategic layout, accelerating the pace of green transformation. Continuous optimization and implementation of tax and other related policies have injected stable expectations for normative development in the industry. Policies such as "large-scale equipment renewal" and consumer goods "trade-in" have effectively expanded resource channels. The entire industry is firmly moving toward high-quality development, providing an increasingly solid resource guarantee for the green and low-carbon transformation of the steel industry.

In 2026, standing at the critical juncture of the start of the 15th Five-Year Plan, with the continuous advancement of the national 'dual carbon' goals and the increasing strategic importance of renewable resources, the strategic value of steel scrap as an 'urban mine' is becoming increasingly prominent. Under the context of the times, the steel scrap industry will usher in a broader and more dynamic development space.

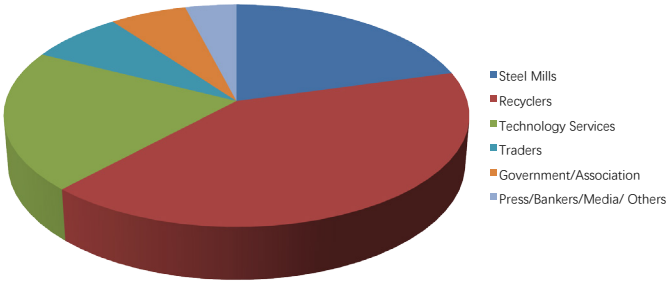

Since its establishment in 2003, China International Metal Recycling Conference have been held for 16 successful sessions. The conference is an important platform for international exchanges and cooperation and further promoting the upgrading of metal recycling sector, pushing forward the development of ferrous and nonferrous metal recycling and utilization, advocating low carbon and green development concept.

17th China International Metal Recycling Conference will invite leaders and experts from relevant ministries, industry experts, relevant industry organizations, domestic and foreign iron and steel corporations, steel scrap processing and distribution enterprises, steel scrap production and manufacturing processing equipment enterprises, trading companies, financial institutions, and consulting and research institutions to jointly discuss the new situation and situation faced by the steel scrap industry.

Now in its 17th session, China Int'l Metal Recycling Conference 2026 remains as the focal point for the Chinese ferrous & non ferrous scrap community and attracts industry-insiders from around the globe to discuss issues impacting the industry. The two day conference is expected to attract over 500 top executives from all sides of the market. Whether you are a scrap recycler, a trader, a steel mill or an equipment provider, this event will put you right in touch with the very latest information at a conference with unrivalled networking opportunities.

Mark your calendar and plan your participation now for the 17th China Int'l Metal Recycling Conference 2026.
